SKINPEN® POST OP INSTRUCTIONS

WHAT TO EXPECT

When you leave the office: you will look like you have a moderate sunburn, some patients may have small pinpoint areas of bleeding/crusting.

Day of treatment, after care: You will need to apply the SkinFuse® RESCUE product to the area treated to help re-seal the skin barrier and reduce inflammation on the day of the treatment. Re-apply throughout the day, especially if your skin is feeling dry. Do not use soap or other products on your skin until the next day. Splashing water on your skin to clean it is ok.

SkinFuse® Post-Procedure Protocol:

Included with your micro-needling package and recommended for use for optimal results.

DAILY IN THE MORNING(beginning 1st full day after SkinPen® treatment):

- Wash face or treated area with the *Purify Cleansing Complex*
- Apply the *Fortify VitaC Serum* to face or treated area
- Apply *Shield* (Zinc Oxide 21%) SPF 30 sunscreen before going outside
-

* If *Surge 1 Collagen Boost* is part of your package, this should be applied to skin once a week.

AT NIGHT:

- Wash face or treated area with the *Purify Cleansing Complex*
- Apply *Reclaim Hydrating Support* to face or area treated

*****IN CASE OF EMERGENCY *****
